DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 20-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Farrar (US 6,395,632).

Farrar describes a semiconductor device comprising (claims 20 and 23): a substrate, an insulating layer 57a, formed on the substrate, made of material including SILK (claimed organic film having low dielectric constant and including no silicon) (col. 4, line 25, line 46-51) is formed between insulating films 55a and 57, made from material including BCB (claimed silicon included organic film) (col. 4, line 20-25; col. 7, line 1-15).

Referring to claims 21 and 24, a conductive is selectively buried into opening portion or trench of the stack films of the insulating films 55 and 57 (fig. 14).

Referring to claims 22, 25, 26, and 27, the BCB film would read on claimed silicon included organic film formed by a polymer of divinyl-siloxane-benzocyclobutene or siloxane-polymide and have the same chemical formula as that of claimed 25 (please all see cited Maex et al. cited below).

4. Claim 28 is rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Farrar.

Referring to claim 28, the layer 55a (claimed hardmask) for used in etching the layer 57a (figure 21) and layer 57 (claimed etching stopping layer) would inherently capable of for use in etching of the organic film since their material, BCB, read on claimed silicon included organic layer as described above. In the alternative, it would be obvious for one skill in the art to use it for etching the organic film with a reasonable expectation success.

5. Maex et al. (US 2003/0162407) is cited to show prior art (paragraph [0038]).

Priority

6. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 2/22/01. It is noted, however, that applicant has not filed a certified copy of the Japanese application as required by 35 U.S.C. 119(b).

Response to Arguments

7. Applicant's arguments with respect to claims 20-28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
